

LaserQuester

User Manual

1. Introduction

In LaserQuester you control a starship tasked with destroying waves of increasingly difficult enemies to protect your home system.

2. Controls

LaserQuester uses a simple control system. Your ship will aim at and fly towards the position of your mouse cursor. Simply left click to shoot your enemies and move your mouse to avoid their return fire.

3. Enemies

LaserQuester has two enemy types that will do all they can to destroy you. The first you encounter will be the lesser green enemy type, flying across your screen seemingly at random and causing damage to your ship if they crash into you. After you kill

enough of the greens you will encounter the blue enemies. These will come at you in groups of 5 and are equipped with lasers they will use to try and destroy you.
